

# SAFETY PATH

A Division of SmarterLite

## Photoluminescent Safety, Warning and Hazard Signs

Safety Path Photoluminescent Signs incorporate safety, warning and hazard symbols and messages on a photoluminescent backing. Improve safety by enabling vital safety messages to be seen in very low-light and dark conditions when the electricity has failed or there is an emergency situation.

### Environmentally Safe & Sustainable

SmarterLite Technology.  
NO Emissions.  
NO Light Globes.  
NO Electric Components.  
NO Batteries. NO eWaste.

### Unique & Customizable

Any standard warning, hazard, safety or fire message can be printed on the Safety Path Photoluminescent Signs. Custom PL Signs can be made with messages unique to your workplace.

### Safety in the dark

Safety messages can be seen in low-light and blackout conditions. Ensure vital safety equipment can be found in the dark.

### Fully Compliant

Workplaces signs compliant with AS 1319.

Highest Global Standards

12 Year Warranty  
30 Year Life Cycle

Directly Replace Existing Signs
